DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a pet diaper, classified in class 119, subclass 850.
 - II. Claims 22-27, drawn to a diaper pattern, classified in class 604, subclass 385.01.
 - III. Claims 28-37, drawn to a method of making a pet diaper, classified in class 604, subclass 385.01.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the pattern and the method of making could be used to make garments for human use (i.e. baby diaper, or sanitary napkin).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3644

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
